

OUR AI CLASSROOM RULES

Use your brain first. AI is a helper, not the thinker.

1

"What problem am I trying to solve?"

I use AI only for task I'm familiar with

4

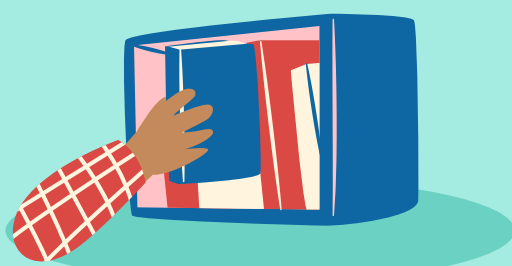

"Try asking 5W + 1H."

I ask what, why, how to AI answers.

2

"Try your own ideas before using it."

I think first, then AI builds on my ideas

5

"Get help if something feels wrong."

I ask my teacher when I'm not sure

3

"AI can make mistakes."

I double check if I don't get it

6

"Use AI to help you learn."

I do not copy and paste

Be curious. Be careful. Be a thinker.
